SILICON AMBU BAG BASIC SET COMPLETE

Item Code : EIB3358

Standards : CE Certified, EN ISO 9001:2008 certified Company - TUV Austria

Set Content : Reservoir Bag, Valve, Face Mask

Item Description : Silicon Ambu bag resuscitators are used in the Hospitals, Ambulance services and emergency medical services. During the usage the bag is manually squeezed, the one way valve at the distal end of the bag closes and the air inside the bag is forced to the face mask via non-breathing valve. This causes inflation of the lungs to the patient. At the time of expiration, expired air passes out through the expiratory channel of non-rebreathing valve and at the same time the fresh atmospheric air is drawn in the self-inflating bag through the air inlet valve.

Silicon Ambu bag are found in three different sizes :

1. Adult - Non rebreathing valve, Adult mask, Patient connector 15mm inside / 22mm outside diameter, oxygen reservoir bag with valve 1 meter oxygen tubing.
2. Child (Pediatric) -Folding silicon below, non-rebreathing valve with 40cm / H2O pressure release, child mask, patient connector 15mm inside / 22mm outside diameter, oxygen reservoir bag with valve 1 meter oxygen tubing.
3. Infant (Neonatal) - Folding silicon below, non-rebreathing valve with 40cm / H2O pressure release, infant mask, patient connector 15mm inside / 22mm outside diameter, oxygen reservoir bag with valve 1meter oxygen tubing.
